## ## 1. Hiragana (ひらがな): The Absolute Foundation

**Hiragana** is the first system to master. It's a phonetic syllabary, which means each character represents a sound (like "ka," "shi," or "mo").

- What are they used for? They are used to write:
  - Japanese words that do not have a kanji.
  - Grammatical particles (the small words that connect sentences).
  - The endings of verbs and adjectives.

**Why start here?** Without Hiragana, you simply cannot read or write complete sentences in Japanese. It is the key that will unlock the door to grammar and reading simple texts. The basic system has 46 characters.

## ## 2. Katakana ( $\mathcal{A}\mathcal{A}\mathcal{A}\mathcal{T}$ ): For Words of Foreign Origin

Once you have memorized Hiragana, learn **Katakana**. They represent the exact same 46 sounds as Hiragana but with different, more angular characters.

- What are they used for? They are mainly used for:
  - Writing words borrowed from foreign languages (for example,  $\bar{\tau} \vee \forall$ , *terebi*, for "television" or  $\exists \neg \vdash \neg$ ,  $k\bar{o}h\bar{i}$ , for "coffee").
  - Onomatopoeia (sound-effect words).
  - Emphasizing a word, much like using italics in English.

**Why learn them second?** Because they are everywhere in daily life in Japan (on menus, in advertisements, etc.), but they are less fundamental to sentence structure than Hiragana.

## ## 3. So, What About Kanji (漢字)?

**Kanji** are logograms of Chinese origin. Each Kanji can represent an idea, a concept, or an entire word (for example, 水 means "water"). There are thousands of them.

• When should you learn them? You can start learning the simplest Kanji at the same time as or right after you have mastered Hiragana and Katakana. Learning Kanji is a marathon, not a sprint. You begin with the most common ones (like those for the days of the week, numbers, and basic elements).

They are essential for reading the vast majority of Japanese texts, as they form the core of the language (nouns, roots of verbs, and adjectives).

In summary, the ideal learning path is:

- 1. **Hiragana** to be able to read and write sounds and grammar.
- 2. **Katakana** to read words of foreign origin.
- 3. **Kanji** progressively, to gain access to reading authentic texts.
